

Elijah Adeyeye

Cybersecurity Specialist

Portfolio | Oyo State, Nigeria | elijahadeyeye@proton.me | +234 708 196 8062

Professional Summary

Cybersecurity Specialist with 5+ years of experience combining behavioural science with technical security practice. Skilled in Python, PowerShell, SQL, and full-stack web development (React, Next.js, Node.js), with hands-on expertise in phishing detection, fraud detection systems, network security monitoring, and website security management. Experienced in delivering cybersecurity training programmes and mentoring early-career practitioners through structured, results-driven development plans.

Professional Experience

Lead Instructor

Nov 2023 – Present

Elitech Hub

- Lead a cybersecurity training programme focused on the behavioural dimensions of security, delivering technical instruction alongside applied psychological insight
- Design and deliver curriculum content combining technical security skills with behavioural science principles
- Develop and run practical training scenarios, including mock corporate network penetration testing and attacker persona profiling
- Trained 200+ students across cybersecurity programmes, supporting cohort planning and outreach to international and diaspora learners

Cybersecurity Career Development Mentor

Apr 2025 – Jan 2026

NextApp Initiative

- Mentored early-career cybersecurity practitioners, helping define clear, role-specific career paths
- Delivered specialised workshops and 1:1 coaching sessions to bridge the gap between certifications and practical job-ready skills
- Developed individualised career roadmaps, supporting mentees in achieving a 100% six-month placement rate
- Advised mentees on industry-related challenges, including ethical considerations, burnout prevention, and skills alignment

Cybersecurity Specialist

Jun 2025 – Dec 2026

Cee Writing Service

- Built, secured, and managed the organisation's website infrastructure, applying secure development and configuration practices
- Conducted security and SEO audits, identifying and resolving rendering, crawlability, and schema vulnerabilities affecting site integrity and visibility
- Maintained ongoing monitoring of web infrastructure to safeguard against technical and access vulnerabilities
- Supported onboarding and access management for volunteer contributors, applying basic access-control best practices

Technical Projects

Behavioural Phishing Detection System

Dec 2024 – May 2025

- Developed an AI model using NLP and machine learning to identify phishing emails from linguistic patterns, urgency indicators, and behavioural cues, achieving 94% accuracy on test datasets; implemented URL analysis to detect suspicious embedded links

- *Technologies:* Python, NLTK, SpaCy, Scikit-learn, TensorFlow, Flask, Pandas, NumPy

Cross-Platform Fraud Detection System

Jun 2024 – May 2025

- Designed a PowerShell-based correlation system spanning Windows logs, network devices, and SQL servers, with a temporal pattern engine detecting 15+ fraud patterns including credential compromise and data exfiltration
- Automated log collection across 3+ platform types (1000+ events/cycle), achieving 90% faster incident detection versus manual auditing with suspicious-pattern identification within 3-second thresholds
- *Technologies:* PowerShell, REST APIs, SQL Server, Posh-SSH, Windows Event Logging, JSON Configuration

Automation & Platform Engineering

2025 – Present

- Built a multi-model AI cold-outreach pipeline (Go, PocketBase) with five-model AI prospecting/verification and automated four-stage follow-up sequencing (days 3, 7, 14, 21), deployed for UK lead generation across multiple sectors
- Built and maintain a full-stack training platform (React/Next.js, Node.js) with blog, research portal, and community features, deployed on Vercel
- Developed a Rust-based social media automation pipeline (Turso/libSQL, Valkey, Gemini Flash/Groq, Telegram approval gate) for content scheduling

Education

Bachelor of Education – Guidance & Counselling with Mathematics

2019 – 2023

University of Ibadan

Certifications

- Computer Forensics and Digital Forensics Masterclass PRO+ – Udemy (2025)
- Quantum Computing Fundamentals with Microsoft Azure Quantum – Microsoft Learn (2025)
- Business Analytics with Excel: Elementary to Advanced – Coursera (2025)

Skills

Cybersecurity:	Behavioural Threat Modelling, Penetration Testing, Phishing Detection, Network Security, OSINT & Digital Forensics
Technical:	Python, PowerShell, R, SQL, SPSS, Go, Rust, Machine Learning, NLP, Full-Stack Development (React.js, Next.js, Node.js)
Analysis & Professional:	Data Analysis, Statistical Analysis, Threat & Risk Assessment, Project Management, Research, Training & Development, Strategic Planning, Mentorship

Additional Information

- **Languages:** English, Hausa, Yoruba
